

Life as a beginning teacher

IN SMALL GROUPS:

Each person say one word that best describes their life as a beginning teacher. Make a list of your words.

As a group make a collage that illustrates the words on your list.

Discuss:

- **What was helpful to you when you were a beginning teacher?**
- **What was missing?**
- **In particular what would have helped you in teaching mathematics?**

Report to the whole group about your discussion. Include the collage as part of your report.
